Packed with patented technologies

X7 Quattro is the latest generation suction powered swimming pool cleaner. 4 exclusive patents cover its cutting edge technology:

1

DiaCyclone patented technology

Enhanced suction power (+40%): all debris is removed from the bottom and walls of your pool.

2

Quattro Traction Control (QTC) patented technology

4 flexible discs provide the extra adhesion required when cleaning the corners and the walls.

3

Flexi Hose patented technology

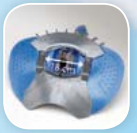

Ensures that pool coverage is maximized, for thorough cleaning of Bottom + Walls + Corners.

4

Twist Lock patented technology

A fully secured hose connection system, for maximum water tightness.

- Thanks to its extra-large suction inlet (18 cm) X7 Quattro takes in more debris with each sweep.

- X7 Quattro comes complete with an inline leaf basket that captures the larger pieces of debris before they reach the pump basket, offering more efficient filtration.

- Compact and lightweight, X7 Quattro occupies a minimum of space.

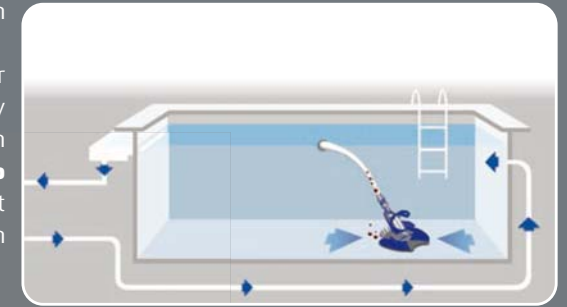

For what types of pools?

- In-ground pools
- All types of shapes (Rectangular, oval or custom shapes)
- All types of pool floors (flat, gently sloping, diving area)
- All types of pool surfaces

X7 Quattro operating system

X7 Quattro uses the pool filtration as a source of energy.

Easy to install, it connects to the skimmer or to the vacuum point without any additional equipment. The power from the pool pump enables **X7 Quattro** to move around automatically and at random, to suck up debris, which is then stored in the pump basket and filter.
